

Jupiter Cycle and Conjunctions

Jupiter Cycle

The influence of Jupiter on everything he contacts is in the direction of **expansion**. He is the **salesman**, whose **good will** and **joviality** enable him to sell his wares or his services at the highest price. **Large** and **generous** by nature he spends no time in petty haggling over small differences in cost. His customers will buy from him, even if they must pay a little more than elsewhere, because he is such a **good fellow**.

This disregard of small imperfections in others, **tendency to forgive** transgressions, and the spirit of give and take which is so essential in life if friction and antagonisms are to be avoided,...here there are no suggestion of restriction, of self-interest, or of coldness; but rather an impression as of a benign and genial giant.

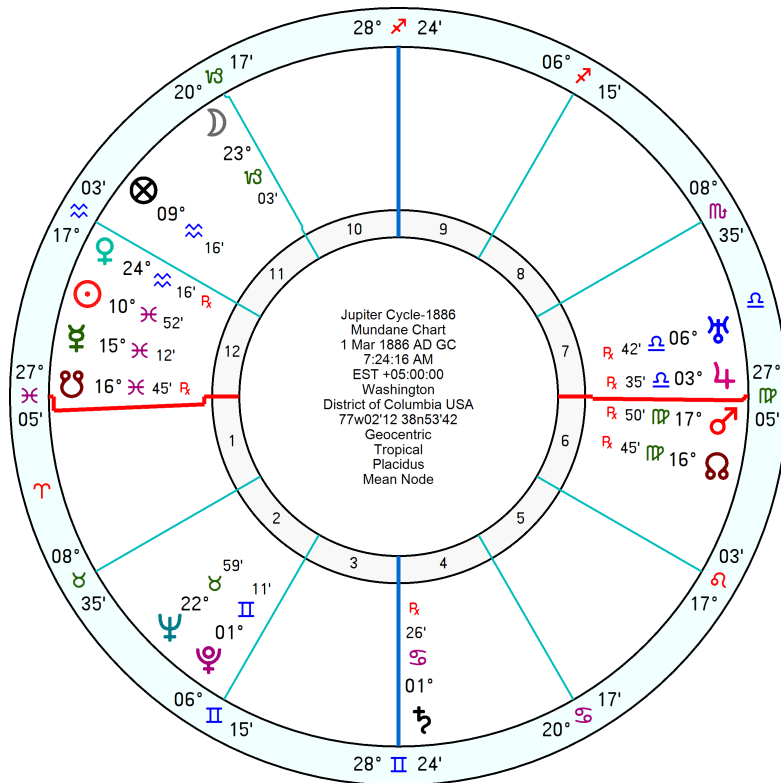

Jupiter **gives and spends** and makes pleasure for others; and this generous attitude awakens a like response in them. They in turn, feeling a sympathetic glow of generosity, give Jupiter more than he asks, and go out of their way to see him prosper. Jupiter, when afflicted, tends to **higher prices, wages, and lavish expenditures**.

Religion and philosophy in thought, **finance and commerce** in business, the influence of **capitalism** in politics are the most outstanding things he brings to pass by progressed aspects.

Treaties, contracts, interstate commerce, ships, long journeys, messages, books, publishing, advertising, public expression of opinion. Teaching, lecturing, preaching, the courts.

1887-02-04 ♈ ♈ ruler of reforms: Interstate Commerce (♈) Act passes after an agitation (♈) of years. State regulation of railroads by legislation and commissions, though upheld by the Supreme Court, was not powerful enough or uniform and gave place to a demand for Federal regulation. Jupiter Cycle-1928

Zain used a time of 9:23 PM with the MC at 5 ♄ 17 and the Asc at 4 ♄ 38.

The most outstanding feature of this chart is ♃, ruler of the cycle, in the house of labour, conjunct the disruptive ♄, square ♄ in the place of homes and farms [4th], sesqui-square the ☾ in the house of Congress [11th], square the place of credit (MC), opposition the people (Asc) and in close semi-square to the ☿ in the house of speculation. In other words, every significant position in the chart with the exception of a semi-sextile to Mercury, and no aspects to Saturn, Mars and Pluto, forms a decided affliction to the planet of finances and business in that planet's cycle.

The ☿ being in the house of speculation and in close opposition to the ☾ (common people), and both

afflicting the financial planet [♃], indicate that unwise speculation of the common people works in the direction of financial disaster. ♄ in the house of business [10th] in opposition to ♄ and ☿, indicates that drastic measures will become necessary to preserve credit, and that business will be sorely distressed, especially as the MC also is so heavily afflicted. The two planets in the 4th, afflicted not only by ♃, but also by ♄ in the house of business, show that farms and homes will suffer great loss through dislocation of business and credit.

But more significant than any other position is ♃ and ♄ in the 6th. Here we perceive that the real maladjustment, which is precipitated by a wild period of universal speculation, has its seat with labour. ♄ rules new inventions and intricate machines, and these have displaced more crude methods which required greater man power. This has not decreased wealth (♃) but has brought about a dislocation in the distribution of wealth.

♄ also rules new methods and changes, and thus points out not only the basic cause of the business and financial dislocation so clearly shown in this chart, but what must be accomplished before the financial difficulties here shown will be past. There must be a radical (♄) change in the distribution of wealth (♃) among those who labour. It is chiefly the restricted buying power of the labourers, including agriculturists and clerical workers, that causes the business disruption here shown; and it can only be remedied by some new method which permits a vast number of people (☾ in aspect to ♃) to share sufficiently in the wealth produced with the aid of labour-saving machines (♄ in 6th) that they provide a

Jupiter Cycle and Conjunctions

mass (♄) purchasing (♂) power.

So far as the finances of the people and general business conditions are concerned, this chart indicates that the whole period, 1928 to 1939, is one of adjustment to the mechanization not only of industry but also of the farm and home, as indicated by ♄ conjunct the ruler of the cycle and in aspect to nearly every planet in the chart.

The following events were listed in the *World Almanac* so all appear consequential (as those are the only ones the almanac would list).

Japan flaunted the parley and became aggressive toward the US (conjunction in 7th).
